PROJECTS

Campus Lost & Found Portal | React.js, Node.js, Express.js, MongoDB, Google OAuth 2.0, Tailwind CSS

- Developed a full-stack MERN portal for students to report lost items, submit ownership claims, and track request status.
- Designed RESTful APIs and MongoDB schemas for users, items, and claims, supporting CRUD operations and role-based approval workflows.
- Integrated Google OAuth 2.0 for streamlined authentication and built a responsive interface with search and category filters.

AI-Powered Developer Portfolio | React.js, Node.js, Express.js, MongoDB, Google Gemini API

- Built a full-stack personal portfolio featuring an AI chatbot that responds to visitor questions about skills, projects, and experience.
- Implemented server-side Gemini API request handling and prompt logic with Node.js and Express.js for context-aware responses.
- Created a responsive React.js chat interface and maintained a modular codebase with Git and GitHub.

Zerodha Clone - Full-Stack Stock Trading Platform | React.js, Node.js, Express.js, MongoDB Atlas, Bootstrap

- Built a responsive stock-trading platform with reusable React components, client-side routing, and multi-page navigation.
- Implemented Node.js and Express.js RESTful APIs and MongoDB Atlas CRUD workflows for application data management.
- Applied modular project architecture, responsive HTML/CSS/Bootstrap styling, and Git/GitHub version control.
